Book Worth a Look: What's Wrong With My Vegetable Garden?

Fri, 01/20/2012 - 09:00 -- Roger Doiron

What's Wrong With My Vegetable Garden? It's a question we've all asked in one way or another. It's also the title of a helpful new 250-page book written by David Deardorff and Kathryn Wadsworth. It's important to be upbeat and positive about gardens and their benefits, but we also need to teach people how to handle the negatives. What I found most useful about this book was the second half which is all about troubleshooting with photos and texts for just about every garden pest and problem you can imagine and several you can't. Well worth a look!
