

DENERS
I O N A L

With the beautiful autumn weather that we have been having, tidying up the herb garden has been a real treat. I pulled out a couple of wheel barrows full of weeds from the garden beds and paths which the chickens picked over and scratched into oblivion.

The newly uncovered bare patches are just taunting me and I can't wait to plant out some of my cuttings and maybe buy some new herbs too. I have rather a vast collection of lavenders and other common herbs and now I am looking into purchasing some of the rarer herbs. In Australia, [All Rare Herbs](#) [1] has quite a comprehensive listing of rare and unusual herbs and I have created a wishlist from their catalogue.
