Harvesting, Curing and Storing Garlic

Thu, 06/24/2010 - 13:07 -- Roger Doiron

I put this video together to demystify the process of timing your garlic harvest and preparing your garlic bulbs for long-term storage. [Even the experts are not always in agreement on these issues](#) [1], so it's easy to get confused. If you're not ready to harvest, because you haven't yet planted your garlic, you'll be more interested in [this other video](#) [2] which walks you through that process. I hope you find this helpful and learn something new.
