Have you ever let a volunteer vegetable plant grow in your garden?

Fri, 11/05/2010 - 13:07 -- amy manning

This year I had the most robust summer squash plant grow in my garden, which I just posted about on my [personal blog](#) [1].

I was curious to find out if any of you have let a volunteer vegetable plant grow in your garden and what the results were.

I know that they say that with many vegetable plants, you aren't supposed to let them grow due to the buildup of disease, such as potatoes and tomatoes.

What has your experience been?
