Greenhouse gardening all year round!

Sat, 12/11/2010 - 15:52 -- aphilbeck8

This is the first year we are growing year round. We just ordered some greenhouse tomatoes, I don't know if they do better or what. Any tips on greenhouse growing, I'll take gladly. We are growing Zuchine, sweet peppers, tomatoes, and cabbage right now. We are trying to add compost to the soil after each season to get the soil right. And then the straw for the weeds helps too. Anyone growing anything else in their greenhouse?
