Vegetable seed review: De Morges Braun lettuce

Sat, 01/01/2011 - 11:28 -- amy manning

I've grown this plant many times in the past, and I've been impressed at how it keeps damping-off diseases at bay and grows relatively fast in cool weather. Right now, I'm itching for spring, and I planted some indoors (without a heat mat), thinking that I could transplant them out relatively early.

If you're looking for a lettuce that is tolerant of cool soils, this is a good seed to stock up on. I bought it through [Territorial Seed](#) [1] Check out my other [seed recommendations](#) [2].
