Using Aviation aluminum tubing for garden projects

Sun, 04/03/2011 - 14:30 -- DWGardener

I have some great aviation aluminum tubing that I'd like to use, to create items for my garden. I tried using some for lining paths, but that didn't work out well. I've thought of making garden chimes, but all the information that I find is too complicate. Have received some suggestions to use some for staking up plants. Looking for more ideas!!
