

## pattimair question

Wed, 12/01/2010 - 10:26 -- pattimair

Question:

How I do prune a 5-way pear tree to form a canopy?

Crops::

[pear](#) [1]

Topics::

[fruits and nuts](#) [2]

Group content visibility:

Use group defaults

Question Details (optional):

All of the grafts are within 3 feet of the ground. Pruning to form a canopy to walk under is my goal. If I let each branch grow laterally I will lose many feet of gardening space. I hope you can picture what I'm saying, this is typical of all multi-fruit trees.
