## Dawn C question

Fri, 07/08/2011 - 09:35 -- Dawn C

Question:

Why are my Brussel sprouts not producing?

Crops::

[brussels sprouts](#) [1]

Group content visibility:

Use group defaults

Question Details (optional):

I transplanted Brussel sprouts about 2 months ago. Only very tiny "sprouts" formed in the junction between the stem and leaves. I broke off the leaves so more energy would go into formation of the sprouts. They are growing extremely slowly. Is this normal or have I done something wrong? At this rate, they might not be ready until October.
