Tue, 04/24/2012 - 16:48 -- KGI

Question:

How do I add content to the site?

Topics::

[KGI website](#) [1]

Group content visibility:

Use group defaults

Answer::

Once you are signed in to the site, you will see a content creation dashboard at the top of the right sidebar. Here's what it looks like and what it allows you to do:

The screenshot shows a content creation dashboard with the following elements:

- Send message to user**: A green envelope icon with a checkmark.
- Blog**: A green pencil icon.
- Recipe**: A green fork and knife icon.
- Messages**: A green envelope icon.
- Photo**: A green camera icon.
- Question**: A green square with a white question mark.
- My Account**: A green icon of a person with a shopping cart.
- Status Update**: A text box containing "Just harvested my first salad ever...super excited!" and a "Post a Status Update" button.

Three red callout boxes with arrows point to these elements:

- Box 1: "Send a private message to another user" points to the "Send message to user" icon.
- Box 2: "Post a photo, recipe, question or blog. Change your account settings or update your profile here. Check your mail." points to the "Photo", "Recipe", "Question", and "My Account" icons.
- Box 3: "Just want to post something short and sweet? Type your message into the box and click on 'post a status update'" points to the text box and the "Post a Status Update" button.
