Question Details (optional):

I have grown a few veggies in the past and have been into gardening for some years but this year I would really like to start trying to grow my own vegetables and fruit. I have got some sweet corn, cabbage, spinach, carrots, purple sprouting broccolli, strawberries, tomatoes and pumpkins. Also some herbs basil, parsley, chives and coriander. I would also like to grow beans, butternut squash, potatos and garlic. Any tips would be greatly accepted before I go out there and end up with a disaster creature feast?
