What are some of the best crops for beginning gardeners?

Question Details (optional):

I'm a complete novice at gardening and most of my previous efforts have resulted in dead plants...but I really want to start growing some of my own food. Can you experts maybe give me some advice on which vegetables it might be easiest to start with...for someone whose "green thumb" is decidedly not very green? I've got a small cherry tomato plant, but I'd like to branch out to carrots...or maybe sweet potatoes?
