bstanfield question

Fri, 06/01/2012 - 19:04 -- bstanfield

Question:

Something's eating my green bean plants. Any advice?

Crops::

[beans \(pole\)](#) [1]

Topics::

[weeds, pests and diseases](#) [2]

Question Details (optional):

I've got a small plot in a community garden, and I'm having trouble with my green bean plants. It seems something keeps nibbling on them. I'm fairly sure it's not bugs or slugs, so I'm assuming rabbits or squirrels (or maybe rats?).

What can I do, organically, to let the beans grow up so **I** can eat them instead.
