## Garlic Harvest

Sun, 06/10/2012 - 15:54 -- johannagreen

Our garlic harvest came early this year, but was a really nice one. I grow mostly soft neck varieties for braiding and ease of storage, but some hard neck for spicy summer eating as well.

It turns out that a garlic harvest is an ideal activity for a preschooler as it involves brute force, minimal delicacy, and dirt.

Since I now have an open bed I'm thinking about growing a crop of back eyed peas as cover. I'd be curious to hear what others rotate in their garlic beds.

Happy harvesting.

Photo details of harvest are [here](#) [1].
