jspringer4 question

Sat, 06/16/2012 - 20:07 -- jspringer4

Question:

The leaves on my tomatillo plants have been turning yellow and dropping off. They're both still setting fruit and the fruit seems to be growing, but I'm worried the plants have some sort of virus. I thought at first they were just reacting to all the rain we've had recently, but fertilizing is not helping. Anyone know what this could be?

Crops::

[tomatillo](#) [1]
