Question:

Why are my tomato plants losing their blossoms?

Crops::

[tomato](#) [1]

Question Details (optional):

I have two heirloom tomato varieties growing in pots on my patio. The plants themselves are doing great. They are blossoming a lot, but then the blossoms dry out and fall off. Is there anything I can do to keep my blossoms from falling off so I can actually get some tomatoes growing? I don't know if it matters, but I am growing Pink Brandywine and Mr Stripey.
