Lettuce Living Wall

Tue, 01/01/2013 - 16:46 -- tariq tanveer

we have a lot of walls here just for privacy and protection not any other use. just i think why not plants.

so i design it in concrete and filled with growing media and planting petunia first. you can see my petunia living wall on my face book id.

because i am much convenue for edible use of spaces, so My Lettuce Wall just a idea how we can use our walls for growing mint, strawberry and also all leafy vegetable

with different combinations of colours.

soon will share my strawberry wall all of you.

Blessed and Stay Healthy!

greetings from QADIR BAKHSH FARMS
