Homegrown Beer to Go with Your Veggies

Fri, 02/08/2013 - 10:22 -- Roger Doiron

It's still too early for homegrown happy hour, but here's a hugely helpful 13 minute video about homebrewing. I had a chance to watch this process in person this past summer when visiting my sister and brother-in-law in Long Beach, CA. My brother-in-law is taking his own brewing to the next level by growing some of his own hops. Cheers!
