LaPine Oregon Gardener question

Sun, 07/21/2013 - 19:52 -- LaPine Oregon G...

Question:

7/21/2013 Living at 4200' elev. summer highs 90-100+ lows 30's-40's with volcanic fast draining soil. We are slowly amending with compost. Does anyone have advice for vegs/flowers that grow in these extremem temps? We also have a small greenhouse with 60% shade cloth. We get winter lows average 12 degrees with -20 lowest low.
